

Space PRO.®

High Density Mobile
Systems by

DIRECTLINE
CORPORATION

SPACE SAVINGS are Only the *Beginning!*

Double your filing capacity.
Or, free up to 50% of your existing
floor space for other uses... work
stations... a conference center...
mail room, etc.

By mounting shelving units on
movable carriages that roll on
tracks, SpacePro eliminates the
need for aisles. You can utilize
your existing shelving or filing
cabinets with the SpacePro system
or select from a wide range of
storage options.

Medical Records Systems

High Density Filing Systems

High Density, Very High Style

From high end legal offices, medical facilities and financial
institutions to warehouse operations, SpacePro complements
the style of your workplace with a virtually endless selection
of end panels in solid colors, woodgrains and beautiful
designer patterns.

An ergonomic handle allows effortless movement of an
entire library.

Law Library

Custom Designs, Creative Solutions

Our experienced Sales Team and
CAD Design department can create a
custom layout targeting your specific
needs with a comprehensive quote for
the mobile system, shelving and
accessories to suit your business
application.

QUALITY ENGINEERING sets **SpacePro**[®] apart!

Multiple Track Designs

All SpacePro track designs incorporate tongue and groove rail connections to maintain proper rail alignment for smooth and easy carriage movement with minimal effort. From small surface mount track systems to raised level deck systems, SpacePro has the track to suit your needs.

Solid Foundation

SpacePro deck systems utilize top grade 3/4" tongue and groove plywood providing a level, safe and substantial walking surface ideal for the floor covering of your choice.

Carriage Design

All carriages come complete with welded cross members that utilize factory installed and tested dual flange wheels housed in lifetime maintenance free bearings.

Mechanical Assist Drive System

Mechanical assist systems feature full-length drive shafts. By turning the handle, the chain drive transfers power to the drive shaft moving all drive wheels throughout the carriage simultaneously. This prevents racking of carriages. A simple chain tensioning device provides infinite chain adjustment for trouble-free use. Manually moved carriages are also available for smaller systems.

DETAILS *make* the DIFFERENCE

Ergonomic Handle

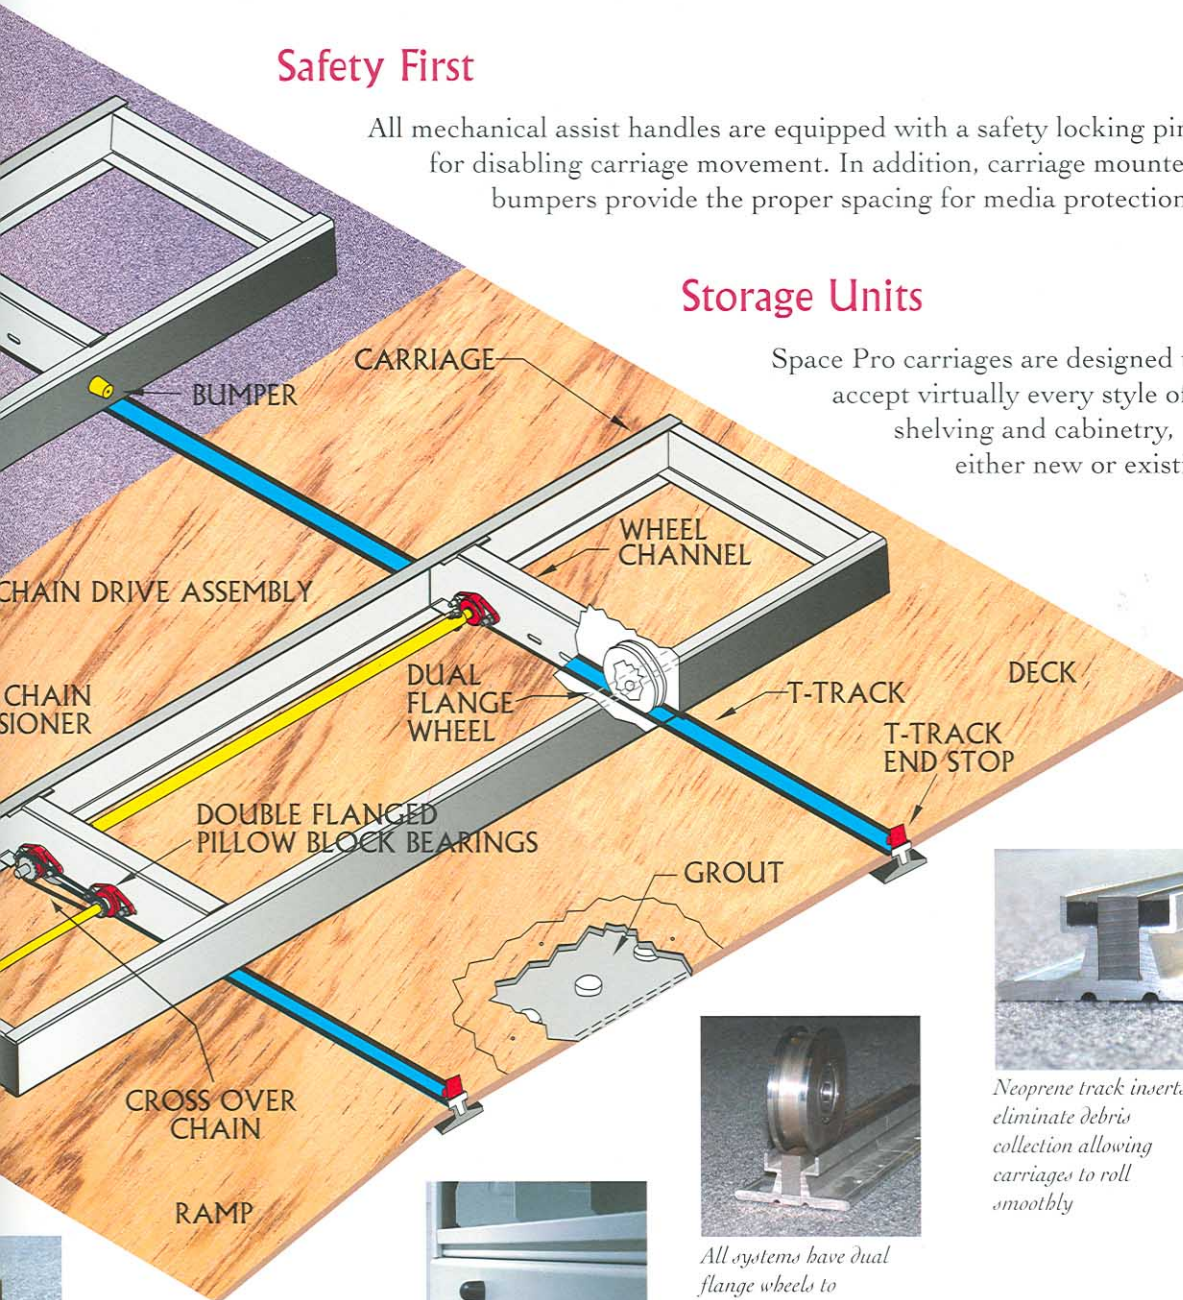

SpacePro's own uniquely designed mechanical assist handle affords effortless carriage movement. By grasping and turning one of the three rotating knobs, users can easily move multiple carriages at one time. The die cast aluminum construction and powder coat finish provide a combination of aesthetics and durability suitable for high-end office environments or heavy industrial work settings.

Safety First

All mechanical assist handles are equipped with a safety locking pin for disabling carriage movement. In addition, carriage mounted bumpers provide the proper spacing for media protection.

Storage Units

Space Pro carriages are designed to accept virtually every style of shelving and cabinetry, either new or existing.

Neoprene track inserts eliminate debris collection allowing carriages to roll smoothly

All systems have dual flange wheels to eliminate carriage derailment

Carriage bumpers for media protection

LIMITLESS Applications
